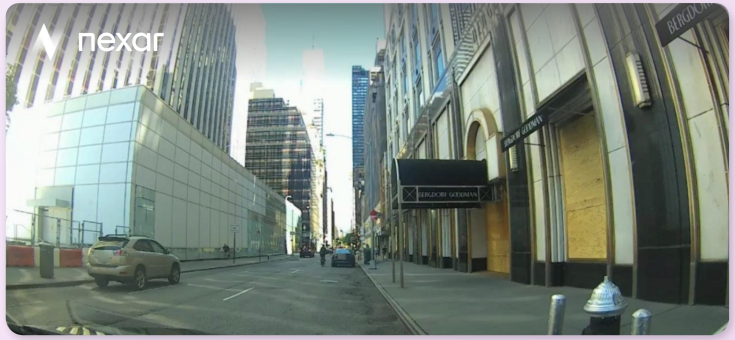
# Nexar Mobility Report

Week of 06-22-2020

getnexar.com



Bergdorf Goodman boarded up, June 13 | Nexar LiveMap

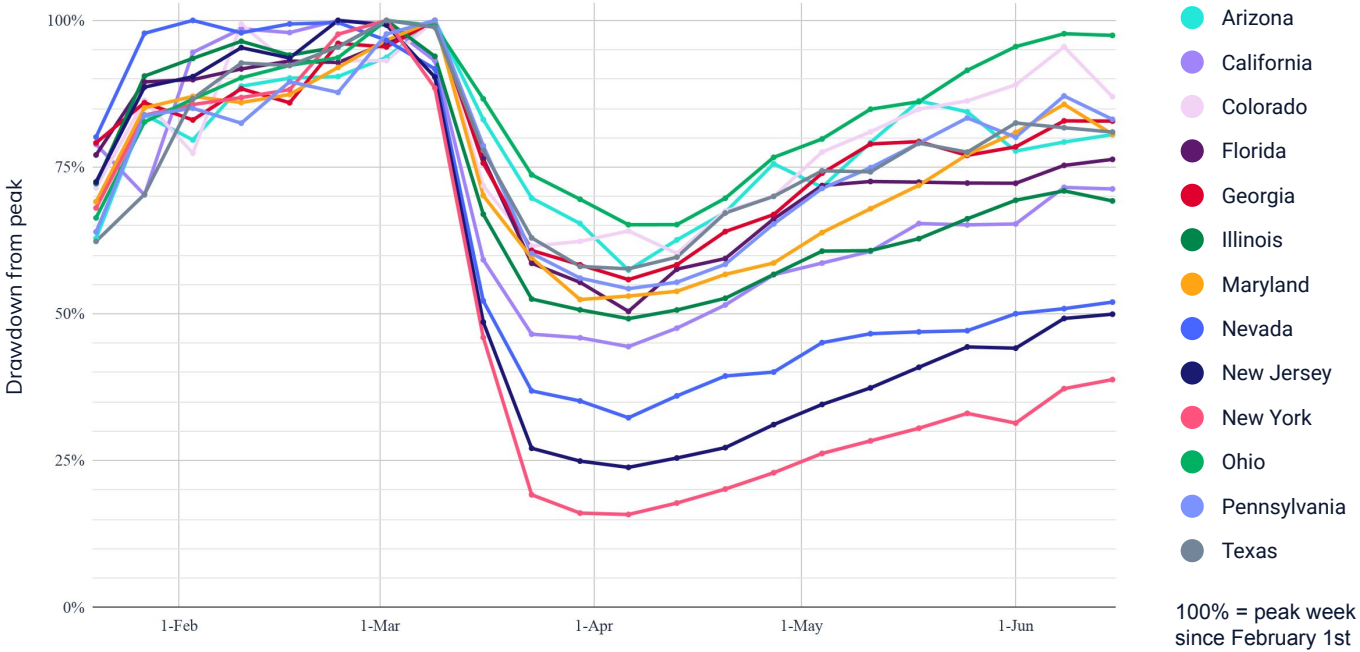
Bergdorf Goodman back to normal, June 24 | Nexar LiveMap

# What We're Seeing

- US driving activity across our network (through the week ending June 21st) does not support a broad-based "V-shaped" recovery.
- While the data has recovered materially from the early April lows (32% of pre-COVID levels), the acceleration has stalled since early June (at around 55% of pre-COVID levels). This is likely a combination of 1) increases in new cases in TX, FL and AZ & 2) ongoing social unrest.
- To explore our data further, check us out on the Snowflake Data Exchange.
- Our network produces visual data as well. Our clients can easily monitor relevant points-of-interest in real-time. To learn more, visit https://www.getnexar.com/virtualcamera/ or see sample imagery on the AWS Data Exchange.

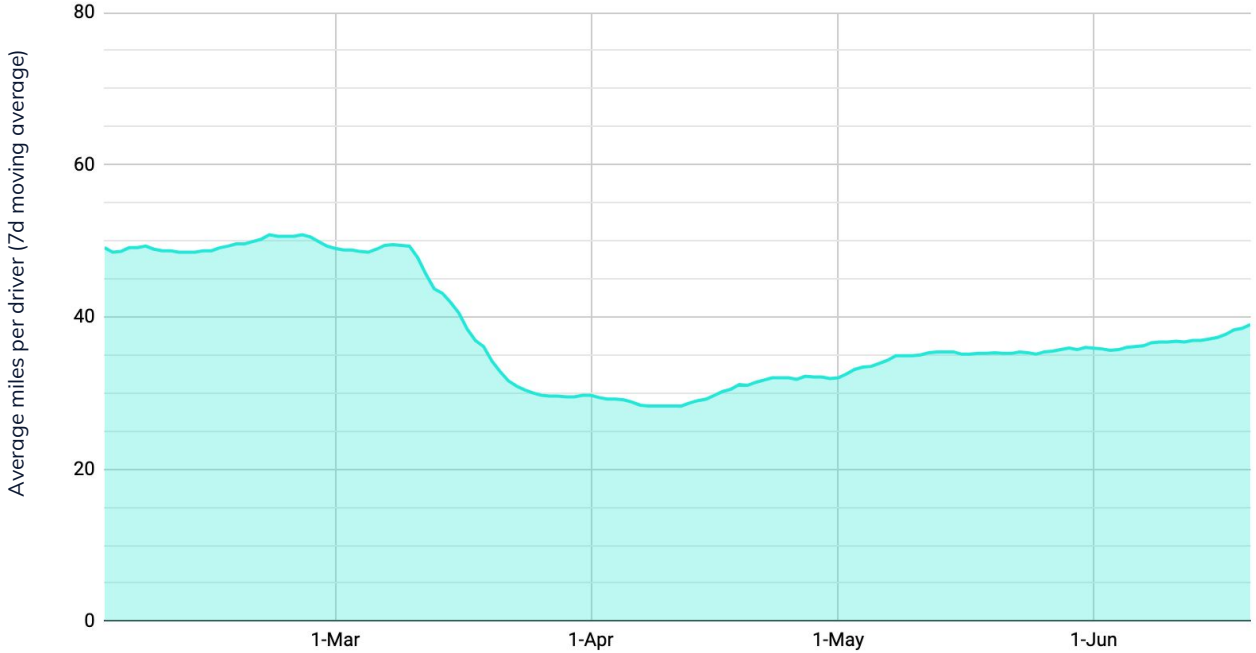
# Weekly Miles Driven by State

**20 Jan. 2020 - 21 Jun, 2020**



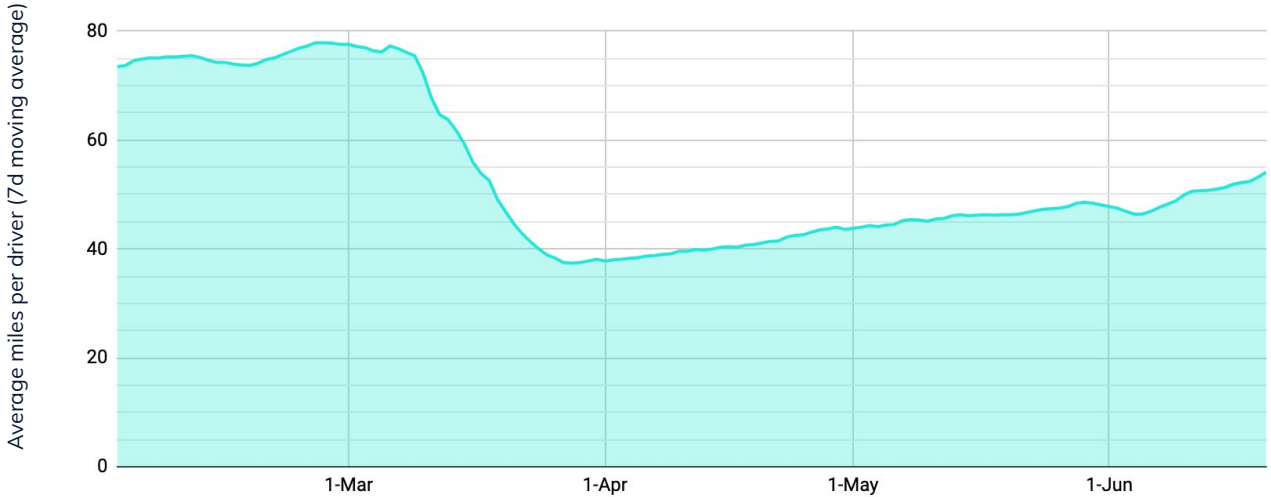
# Miles Per Driver in Nevada (7 day average)

1 Feb. 2020 - 21 Jun, 2020



# Miles Per Driver in New York (7 day average)

**1 Feb. 2020 - 21 Jun, 2020**

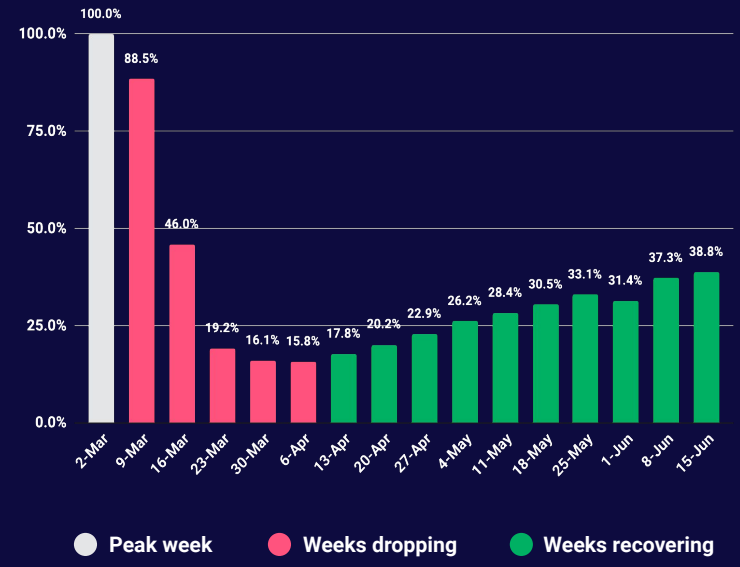


**New York**
Sudden drop & sluggish recovery

nexar

## % Change in Total Miles Driven

New York State, 2 Mar. 2020 - 21 Jun. 2020

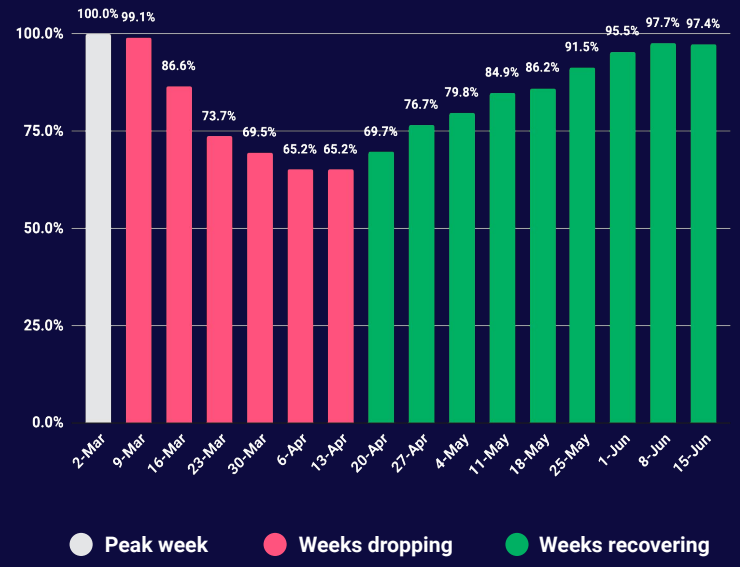


**Ohio**
Slow drop & fast recovery

nexar

## % Change in Total Miles Driven

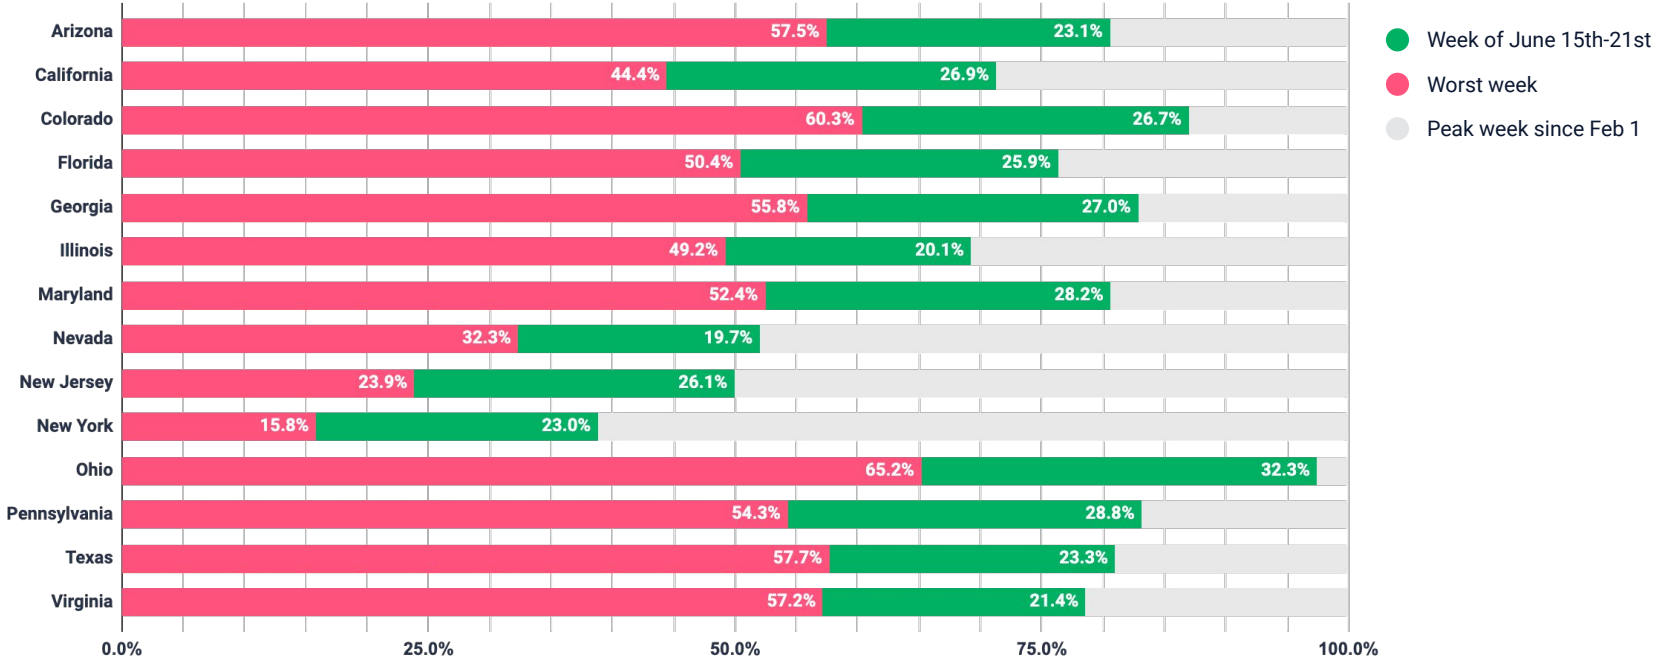
Ohio, 2 Mar. 2020 - 21 Jun. 2020

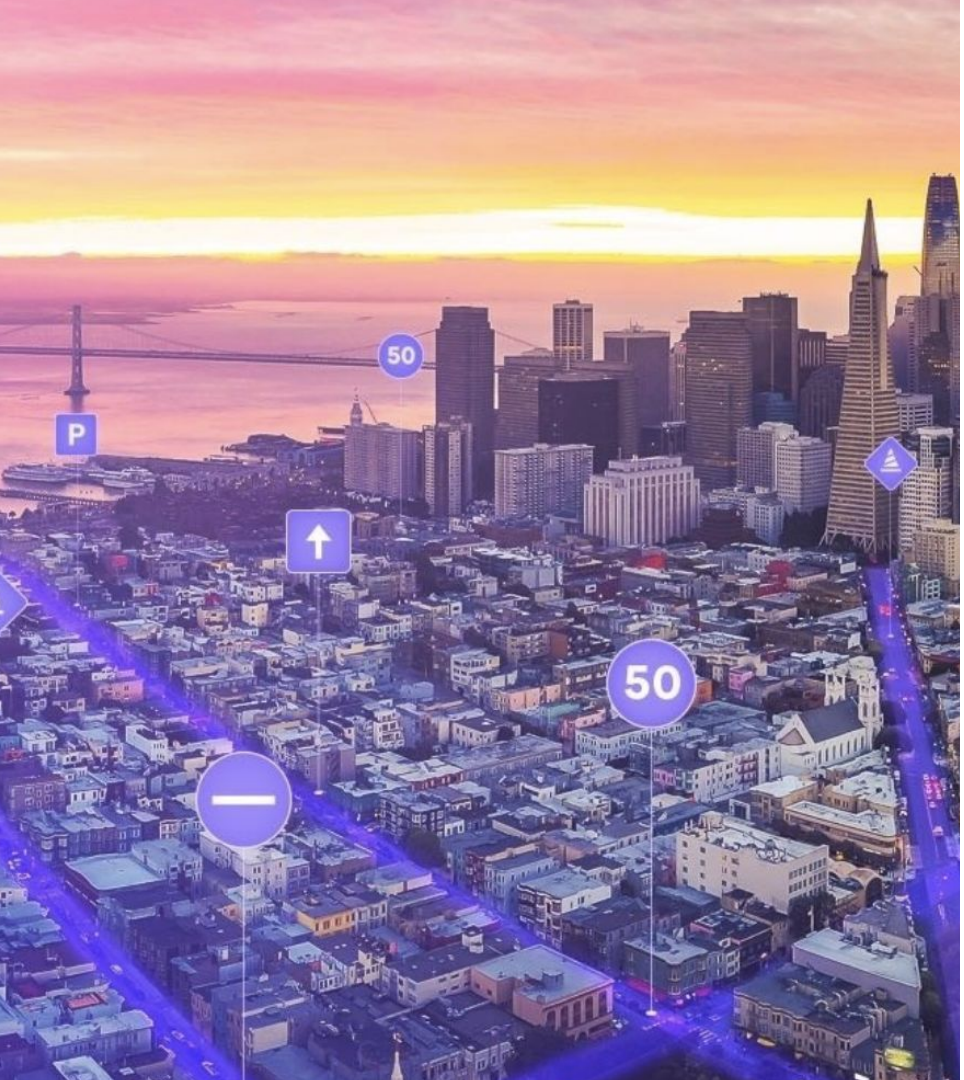


nexar

# Mobility by State - The Shutdown & The Reopening

% of Total Miles Driven (vs. peak since Feb 1)





# What is Nexar?

Nexar connects drivers on the road for a safer, smoother journey. When people pair Nexar-enabled dash cams with the Nexar app, they join a connected vehicle network that uses computer vision and sensor fusion to see hazards on the road and alert those in the surrounding area.

Using cutting edge AI, both in Nexar's app and on the cloud, Nexar analyzes frames and gets you actionable data so you can understand the physical world better and faster.
